Part A · Picture choice

4 POINTS

- 1 Which one gives us light and heat in the day?

B · Sun

The Sun gives our planet light and heat. Daytime is when our part of Earth faces the Sun.

- 2 Which one takes astronauts into space?

A · Rocket

A rocket is what launches people and spacecraft up into space.

- 3 Which one is our home planet?

C · Earth

Earth is our home planet. It is where we live.

- 4 Which Moon looks like a whole bright circle?

B · Full Moon

When we can see the whole sunlit side of the Moon, it is called a full Moon.

Part B · True or false

3 POINTS

- 5 The Sun is a star.

True

The Sun is a star. It looks big and bright because it is much closer than other stars.

- 6 The Moon makes its own light.

False

Moonlight is really sunlight bouncing off the Moon.

- 7 Night comes when we turn away from the Sun.

True

Earth spins. When our side faces away from the Sun, it is night.

Part C · Matching

3 POINTS

- 8 Sun

C · Gives us light and heat

The Sun gives Earth light and heat.

- 9 Moon

A · Goes around Earth

The Moon orbits Earth, which means it travels around us.

- 10 Astronaut

B · Wears a space suit

Astronauts wear space suits to stay safe when they work outside in space.
